Internship Project & Evaluation Report

UI/UXDesignInternship · Summer2026

Vaishnav Verma· UI/UX Design Intern

Digital Hercules Innovations · March 01 – June 15, 2026

SUMMER 2026

Internship Overview

Contributed to core digital platformdesigns acrossmobileand web — spanning user research, wireframing, high-fidelity prototyping, design systems, and user-journey optimization.

Role

UI/UX Design Intern

Organization

Digital Hercules Innovations

Duration

3.5 Months

Focus

Mobile & Web Product Design

Certificate ID

DHI-DD-0006-26-08-15

March 01, 2026

Internship Begins

March – May 2026

Design Sprints & Delivery

June 15, 2026

Internship Concludes

RESPONSIBILITIES

Role & Key Responsibilities

1. **Research**
2. **Define**
3. **Wireframe**
4. **Prototype**
5. **Test**
6. **Iterate**
7. **Handoff**

User Research & Personas

Conducted research, created personas, and mapped user journeys to identify pain points.

Wireframing & UI Design

Built wireframes and high-fidelity UI screens aligned to product requirements.

Interactive Prototyping

Created clickable prototypes to validate flows and gather stakeholder feedback.

Design Systems

Built reusable components and maintained design tokens for consistency.

Accessibility Auditing

Audited designs against WCAG 2.1 AA standards for contrast and navigation.

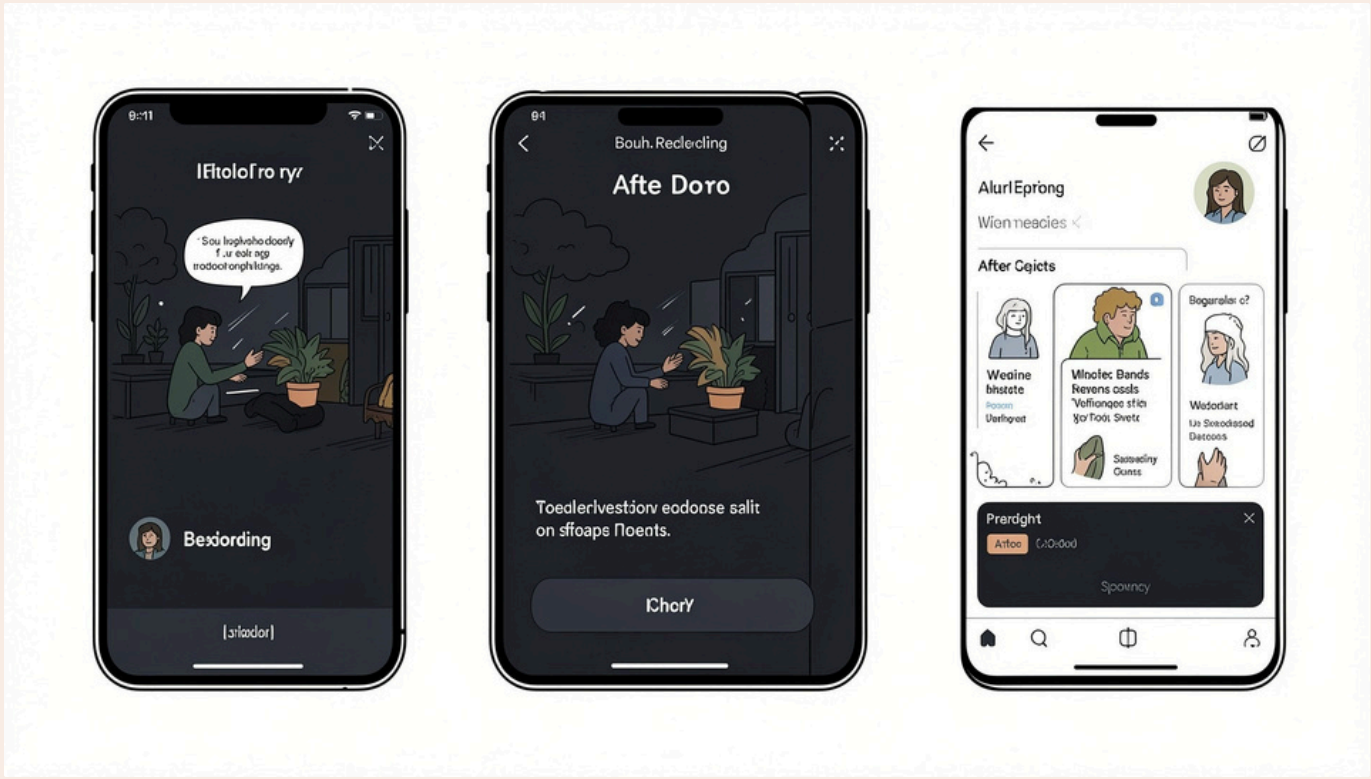

Developer Handoff

Prepared specs, tokens, and assets; collaborated with engineers to resolve edge cases.

PROJECT 01

Mobile App Onboarding & Navigation Overhaul

Objective: Reduceonboardingbouncerateandsimplifyappnavigationthrough a data-informedredesign.

Analytics

Analyzed drop-off data and heatmaps to identify friction points.

Problem Identification

Mapped user-flow issues and prioritized redesign opportunities.

Redesign

Created a 4-step onboarding flow with progressive disclosure and standardized touch targets.

Usability Testing

Validated improvements through structured testing sessions.

Applied principles from **Material Design** and **Human Interface Guidelines** throughout.

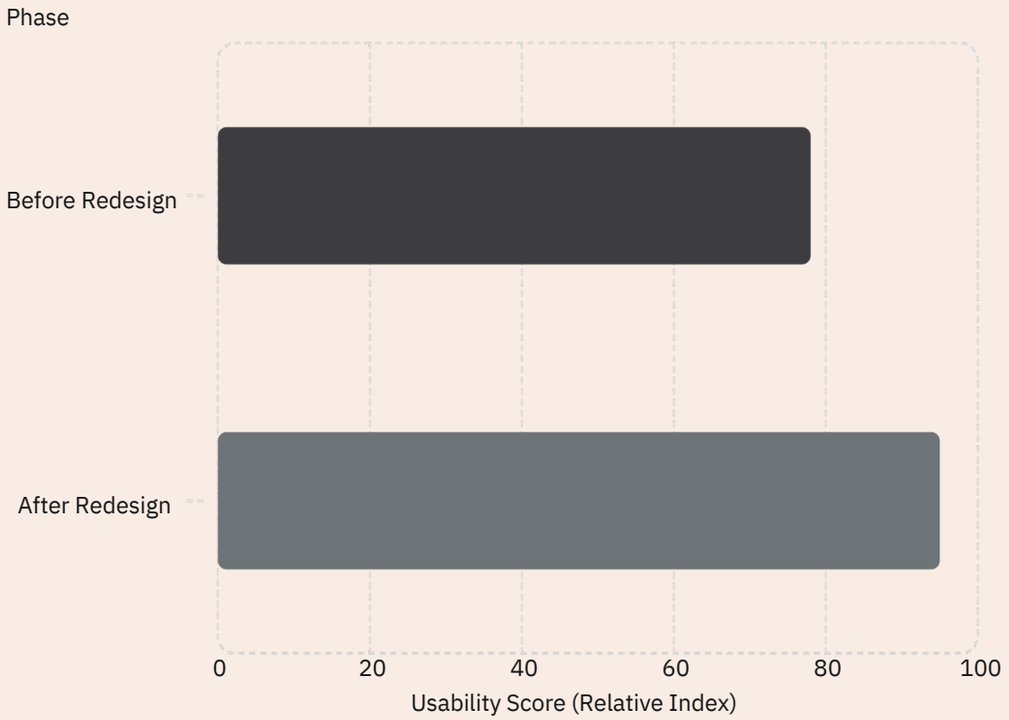

PROJECT 01 · RESULTS

Results & Impact

22%

Usability Score Improvement

Measured across structuredtestingsessions post-redesign.

Key Improvements

- Simplified onboarding flow with progressive disclosure
- Improved navigation clarity and information architecture
- Reduced interaction friction across primary user journeys
- More consistent UI patterns and visual hierarchy
- Streamlined sign-up experience with fewer steps

PROJECT 02

Web Platform Dashboard Redesign

Objective: Modernize the primary user dashboard for web applications with scalable, accessible components.

01 Design System

Built scalable interactive UI components in Figma with reusable cards, navigation bars, and modals.

02 Components

Created tables, data cards, interactive controls, and modal dialogs for consistent reuse.

03 Dashboard

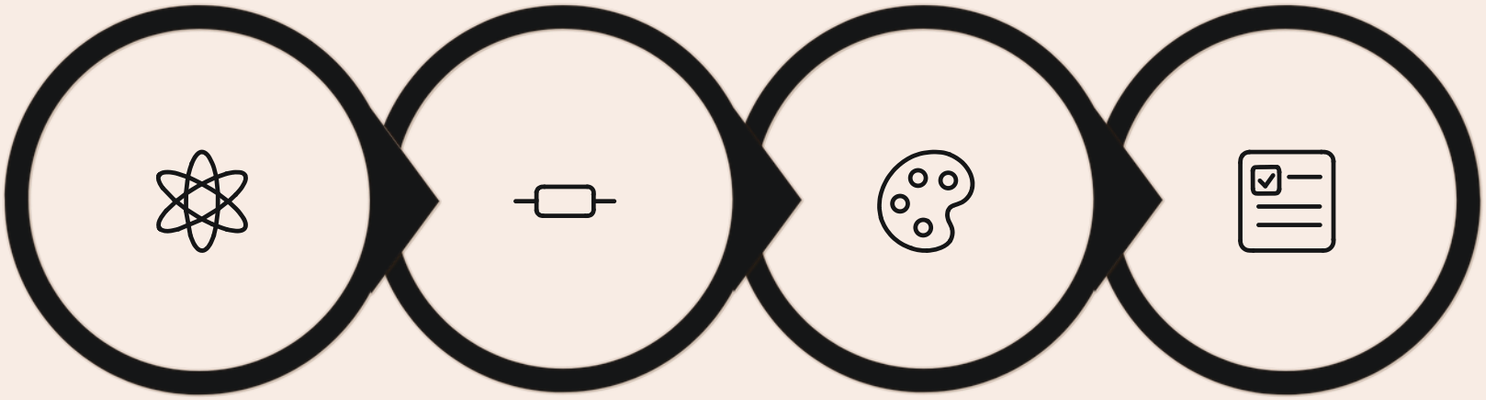

Conducted accessibility audits toward WCAG 2.1 AA compliance for contrast and screen-reader navigation.

04 Developer Handoff

Prepared design tokens, specifications, and assets for smooth front-end implementation.

DESIGN SYSTEMS

Design Systems & Developer Handoff

Structured design documentation enabled smoother implementation and reduced ambiguity during developer collaboration.

Design System Components

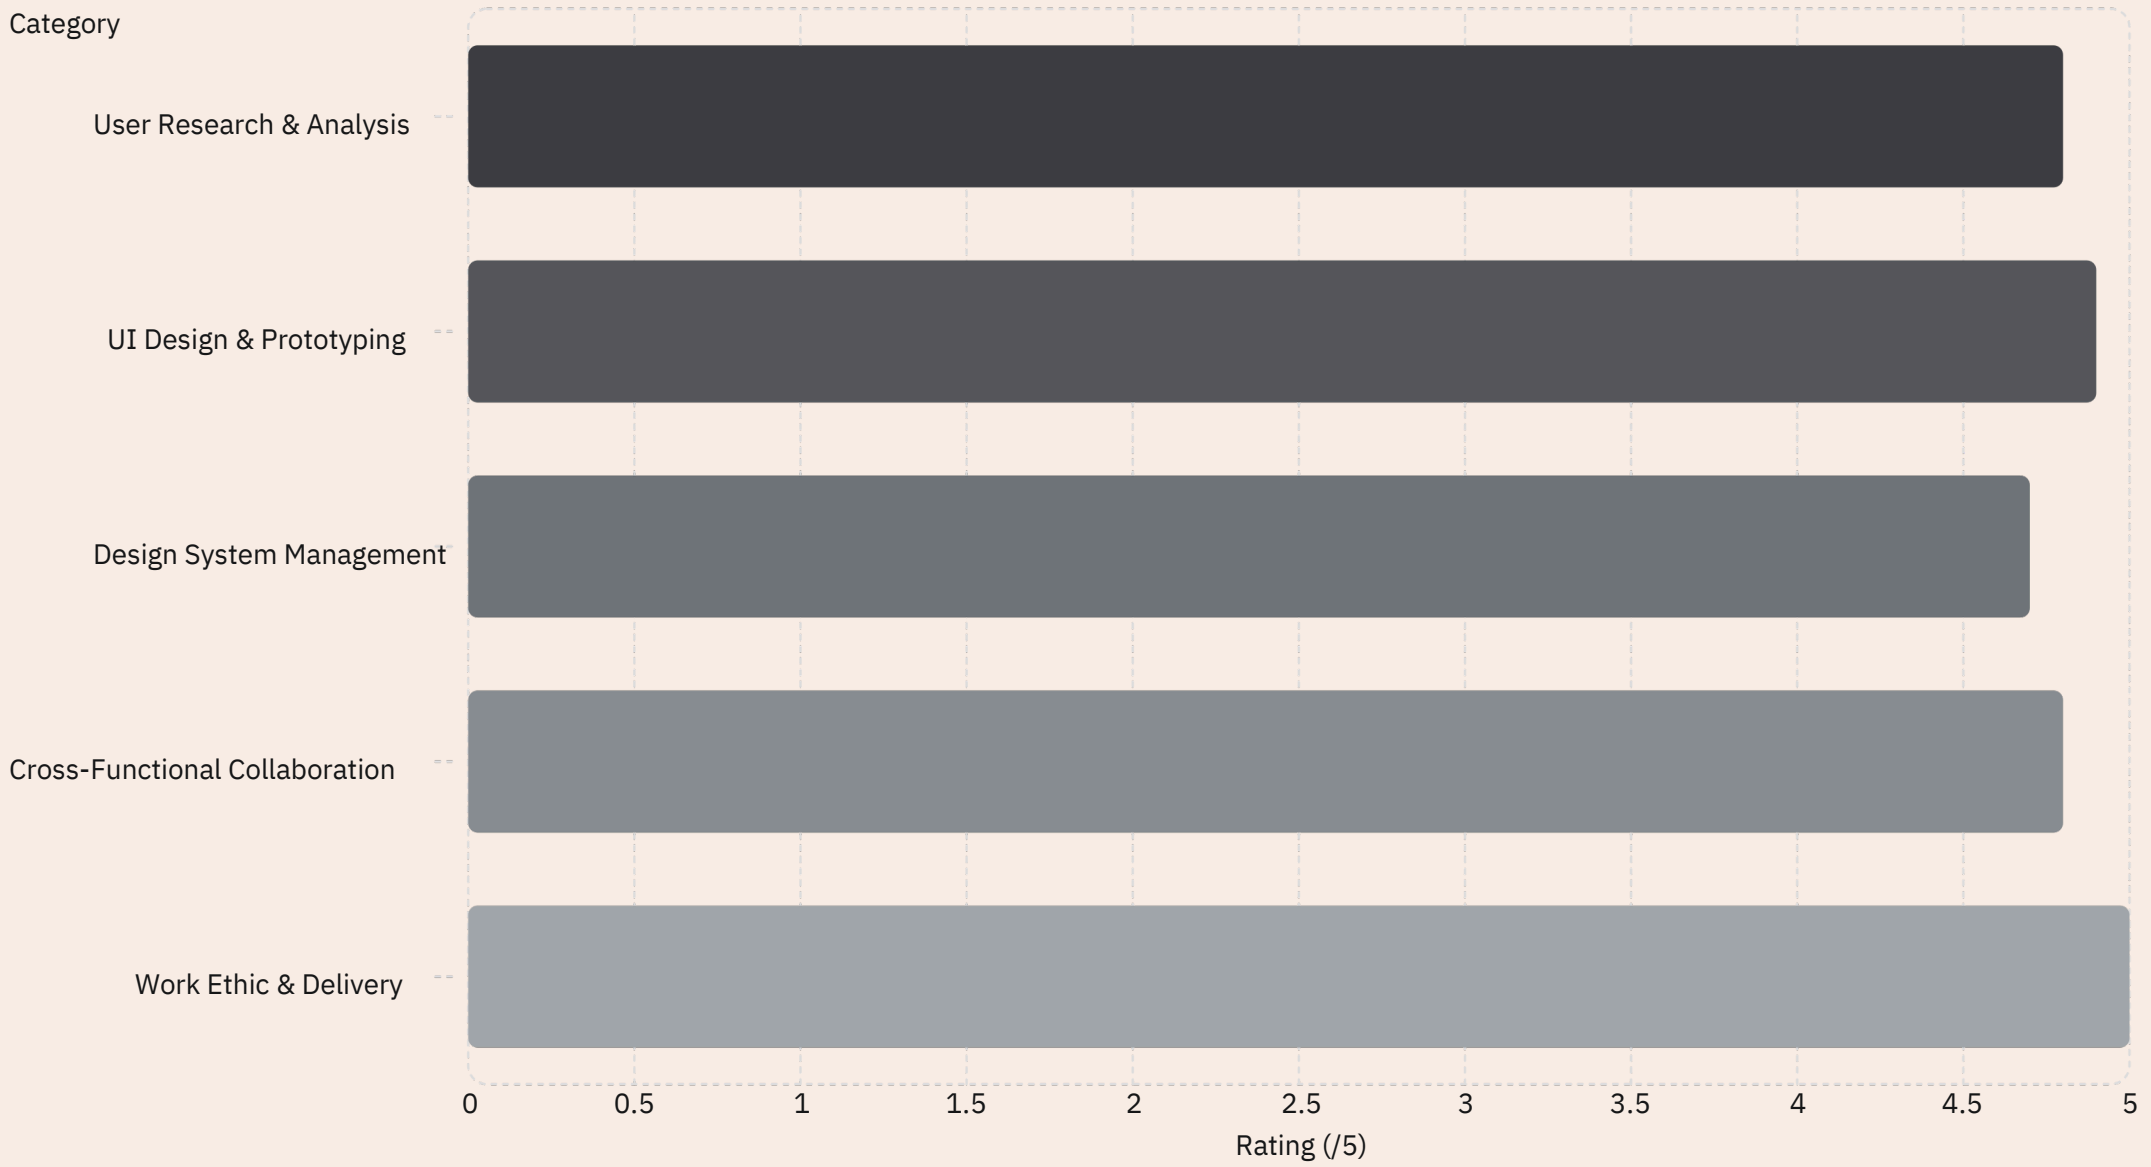

- Typography styles and scale
- Color tokens and palette
- Spacing and grid system
- Buttons, cards, and navigation
- Form elements and modals

Developer Collaboration

Structured designs and documentation for smoother implementation while working with front-end engineers to resolve UI bugs and edge cases.

ASSESSMENT

Skills & Competency Assessment

User Research

Personas, journey mapping, wireframing, competitive analysis

UI Design

High-fidelity screens, auto-layout, interactive micro-animations

Design Systems

Atomic design, component libraries, design tokens

Collaboration

Developers, project managers, product leads

Delivery

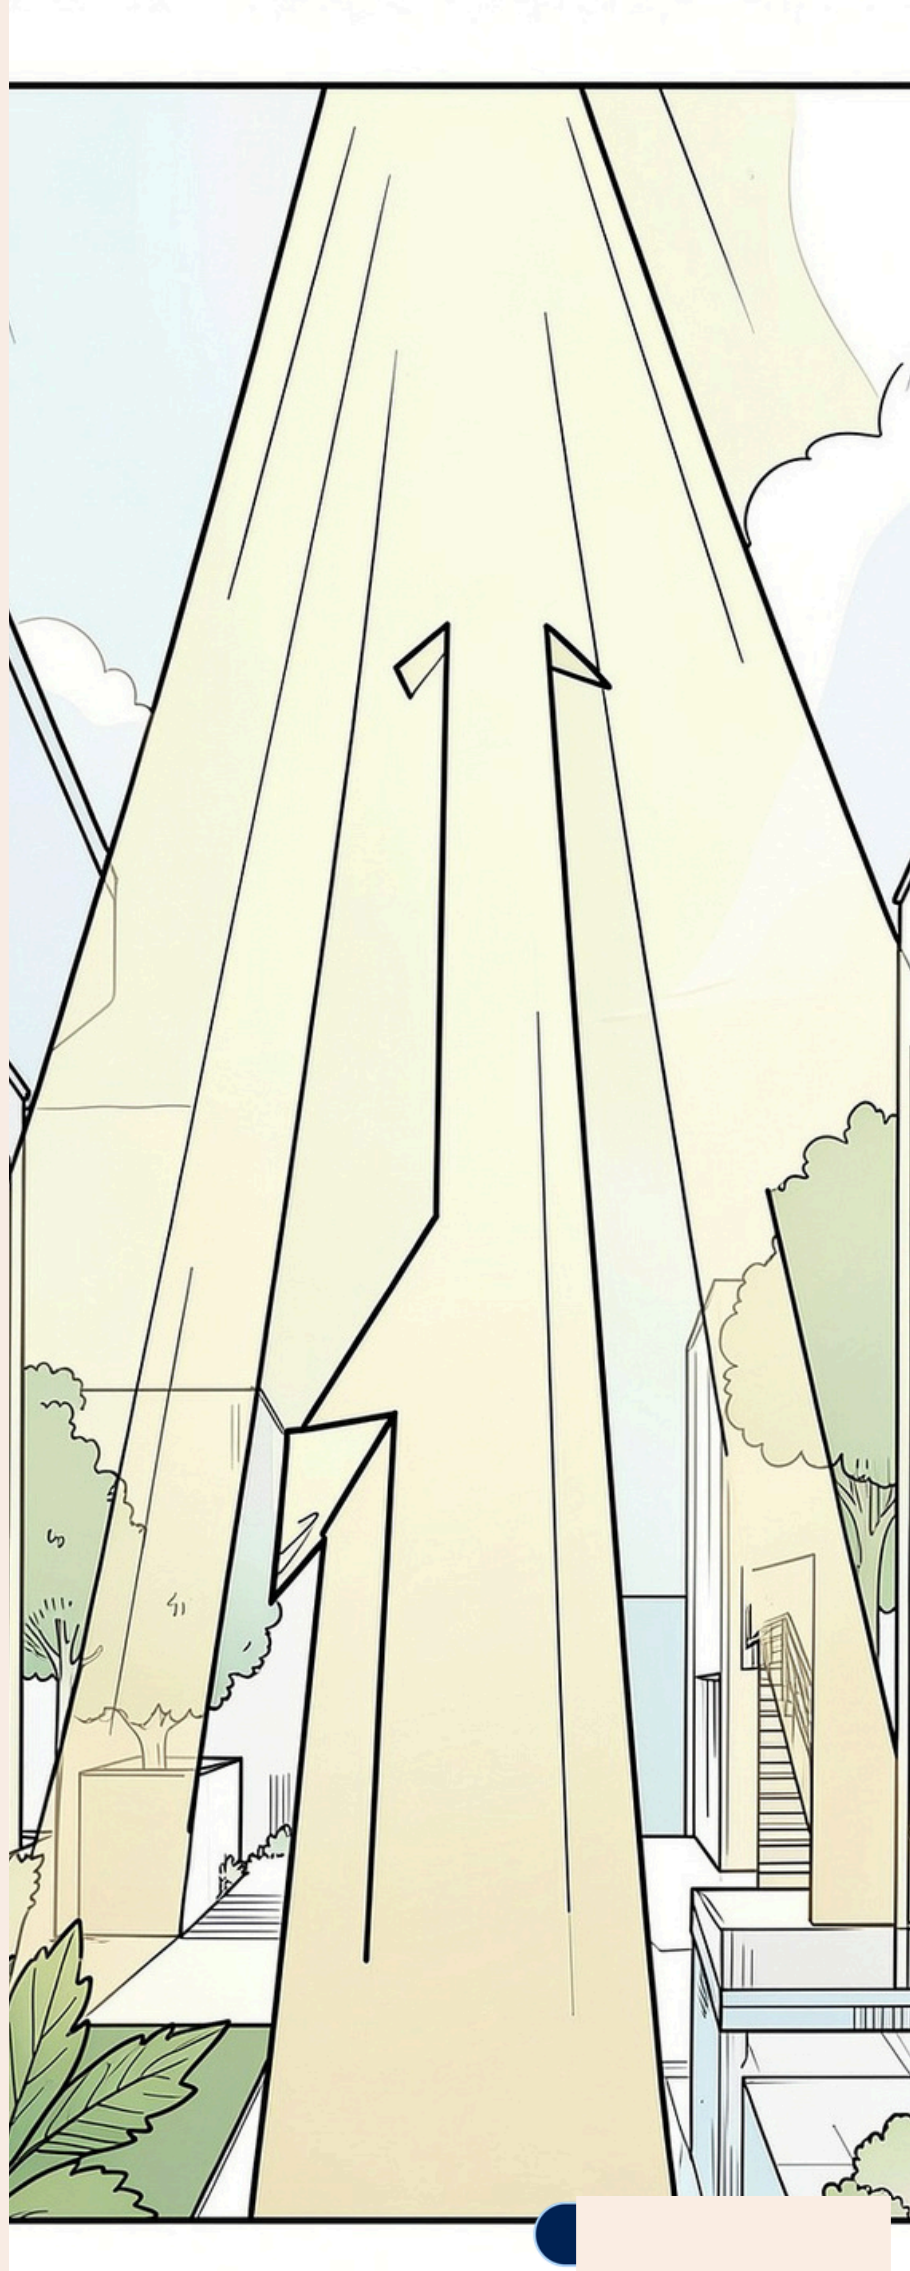

Proactive problem-solving, attention to detail, on-time sprint delivery

REFLECTION

Key Learnings & Professional Growth

1	**Design Systems at Scale** Mastered creation and maintenance of reusable UI libraries to maintain consistency across web and mobile ecosystems.
2	**Developer Handoff** Learned to structure designs for smooth implementation and collaborated with front-end engineers on UI bugsand edge cases.
3	**Data-Driven UX** Integrated user feedback and analytical insights into iterative design sprints rather than relying solelyon visual preferences.

1. **Design Thinking**
2. **Product Thinking**
3. **Data-Driven Design**

FINAL EVALUATION

Final Evaluation & Certification

Thisreport summarizes theinternship projectcontributions, designoutcomes, and competency assessment for Vaishnav verma as part of the Summer 2026 UI/UX Design Internship at Dig ital Hercu les Innovation s.

This report summarizes the internship project contributions, design outcomes,andcompetencyassessmentforArshZaki as part of the Summer 2026 UI/UX Design Internship at Digital Hercules Innovations.
